

before they came there. I have great doubts whether you would get ~~that~~ much ~~very little~~ treatment with ~~the~~ success, with profit to the patients after they have been treated in private practice, as they generally have been. That is my opinion. A large class of medical men I think would give that opinion.

Q. That nothing can be done? A. I don't think there is much to be done at that stage in that direction.

Q. You have never been a physician there
A. No, sir.

Q. Have you not known of certain persons being brought out of that hospital and subjected to that local treatment and restored? A. I have not.

Q. Whether you would have a male or female physician, would you recommend no attempt to treat diseases which you yourself think is a prolific cause of insanity?

A. I haven't said so and I don't know as it is proved that that is a very prolific cause of insanity. It is a cause, but not so prolific as some other causes as I understand it. I
