

founded on the floor. I have heard no complaint that I have used too much restraint

Q. You have heard nobody complain of the ledge system except because they were cold have you? A. No, sir; and being put in naked. They go out twice a day to ride. The rule is when they can have the team. Our teams this winter have been occupied considerably. There may have been times as long as 3 weeks when patients have not gone out, I don't remember; but there was always some thing to prevent, the weather or occupation of the teams. The patients go out ~~both~~ to ride both forenoon and afternoon, one load in the forenoon and some times 2 in the afternoon. We have made no changes since this investigation began. We have gone on in the even tenor of our way. The patients do not go out so much in the winter.

They rather shrink from going. As a general thing some of them shrink from much physical activity, and others are
