

Ques. After you got over there how much time did you ordinarily spend looking round the hospital, take your first visit.

Ans. My first visit I went there in the afternoon in company with Mrs. Trumbly who had had a year's experience as a visitor and she called my attention to several cases in which she thought the patients were sufficiently improved to be discharged, that they would be better off at home. I think I spent a half day on my visit there; the next morning I drove over to call Dr. Harlow's attention to ~~my~~ one particular patient whom I was impressed was all right and would be better off at home; I did not find Dr. Harlow, I did call Dr. Sanborn's attention to that case and came home.

Ques. Did you advise Dr. Harlow or Dr. Sanborn to discharge this patient. Ans. Not at all. I did not feel competent to do it
