

- Q. How many years have you been one of the trustees? A. About a year.
- Q. Have been a member of this last board?
- A. Yes, sir. The first meeting that I attended was in March.
- Q. During that time have you been in the habit of making visits to the institution? A. I have occasionally. I think I have made 4 or 8 visits besides what I have been there during this investigation. During this investigation I have been there day and night the most of the time. I think I have never made a visit to the hospital without going through the wards and seeing the patients and attendants and conversing with them.
- Q. How long have these visits lasted generally? A. Depended upon circumstances. We have monthly visits and quarterly visits and semi-annual visits. I haven't been there at any time I think without going into some part of the halls; go through with the Dr., but not every day. When we make the monthly visit we get through with it in a day generally; go through the different halls, see
