

Monday, Feb. 28th.

All of the clamutter present  
except Messrs. Hill, Dudley Wentworth and  
Linscott.

Henry W. Barlow, recalled.

By Mr. Baker:

Q. I want to call your attention to  
the case brought up on the other  
side, of premature birth. State in your  
own fashion all the facts in relation to  
that. A. The female patient in question  
was admitted to the hospital some time  
in April I think 1876; I am not  
quite sure about the year, but  
I know it was the first of April,  
and it went along until the last  
of July, when the attendant came to  
me and said the lady was sick.  
I think that was July 26th. And I  
went right in immediately and found that  
there was considerable flowing. I  
immediately covered the lady up and  
went out and called for Miss. Kain  
the supervisor who has had experience  
in lying-in women, nursing.
