

My first visit there in the night we went in I think a little past 10 o'clock, Mrs. Quimby had keys to one side and Mr. Buffum and I keys to the other and we went all through the institution; it was in June, and the ventilation was so bad that it was almost impossible to go through some of the halls the air was so foul, and we made great complaint about that. Since then the ventilation has been improved very much.

Ques. Do you think that everything has been done that can be done to improve that hospital. Ans. I think without considerable outlay in the construction of the building which I am not competent to judge about as to the way it should be done, it is about as well managed as it is possible.

Ques. Would you say that you thought that everything was done that could be done towards improving the curability of the hospital. Ans. That I am not competent to judge upon.

By Dr. Butler.

Ques. Was it not through your influence that an extra night watch was put on. Ans. We recommended it, it might have been done without our recommendation.

Ques. Was the food such as you would be satisfied with
