

A. Demented, incurable.

By Dr. Butler:

Q. You say when you were in the room you didn't examine the case at all

A. I made no critical examination any more than I would of any person who would be in a state of profuse menstruation

Q. How far would ~~that be~~ necessary

A. Just to open the bed to see what the condition of the person was.

Q. You did ~~that~~ A. Yes sir. My judgment is that it had not progressed ~~far~~ enough to discover without a digital examination.

Q. When you went after Miss. Bam what did you tell her A. I asked her to go in and see Mrs. Reed; that she was sick, flowing, and needed attention

Q. Did you give her any direction

A. I don't remember ~~that~~ I did. I gave her directions after we got through with the operation

Q. But before Miss. Bam came in did you give the attendant any directions

A. No, sir.
