

Q. Or nearly restored in mind after the confinement was over? A. We thought she was going on to full recovery but in a short time she seemed to relapse.

Q. Do you think that was due in any way to her being placed back in the wards? A. Not the least.

Q. Think that had any influence on it at all? A. Not the least. She was in the third best ward we had. We had 2 wards which were better but Alice was next.

Q. Was it the same ward she was in before confinement? A. Yes sir.

Q. Was she growing better or worse in this same ward before her confinement?

A. There was no particular difference that I know of. She was rather stationary.

Q. Are there any other facts in reference to that you think of? A. As I have stated, I notified the husband in relation to the case, and he came to see her about the first of Aug., and I remember of notifying the lady of the board of visitors in relation to it, and she made due inquiry into the case.
