

the temperature for an insane patient to be put into the rooms naked without suffering from cold. Ans. My own judgment was that 56 was rather too low for a person that was nude, and I recommended that they add a slight amount of heat during the night as the result of that, a very little increase of temperature would be sufficient. For a patient in a nude state, I think it would want to be up to 60 or 65.

By Dr. Butler.

Ques. What time did you go over. Ans. After the last train, after 8 o'clock.

Ques. Were you in the house with Dr. Hallaw. Ans. I saw Dr. Hallaw in the evening, but I did not state to him about the matter.
