

wire netting made of No. 12 wire, the meshes about  $\frac{3}{4}$  of an inch square; that is put into a frame and screwed together; on one side is a lock and on the other side a pair of large hinges.

Ques. Are all the wards separated by locked doors.

Ans. Yes sir; the usual practice is to keep them locked.

Ques. The patients of the different wards are locked into their wards generally. Ans. Into the separate wards.

Ques. In the most remote part of the building, highest ward, how many are the most doors a man would have to unlock to get out doors. Ans. It would be about as difficult to get out of the lodge as anywhere; there are 5 doors that would have to be unlocked.

Ques. It was about an hour before Smart could get the watchman that night. Ans. We had his story for it, I don't know.

Ques. Did you believe him. Ans. I would not believe him under oath.

Ques. Did you ever say that Dr. Harlow had been there long enough. Ans. I cannot answer that question. I went in last fall for a clean board. I do not want to see one place filled by a man perpetually as a general rule, and with one or two exceptions &
