

the jaundice. We considered it not fit,  
and ~~that~~ was reported to Church. That  
ox was bought by the hundred I think,  
I would not say positively. Any way,  
the ox was sent back to the man  
we had it of, and the mate with it,  
which was alive.

Q. Have there been other cases? A. Yes,  
2 cases since that time.

Q. Relate the third one. A. The first  
one was some where in the  
neighborhood of 3 years ago, I would not be  
positive. I hitched one and after I got  
it hitched there seemed to be trouble with  
its liver, affected badly. I was then  
foreman of the farm. I reported that to the  
steward, to you.

Q. I omitted to ask you the appearance  
of the second ox before it was slaughtered:

A. It was a good, healthy looking  
ox; you could not detect any trouble at all;  
looked as if he would make good beef.

Q. How was it about the next one?

A. It was a good looking, healthy  
animal. You could not detect any thing  
until after it was killed. That was a
